The screenshot displays a SQL IDE interface. The left sidebar contains a 'Navigator' pane with sections for 'MANAGEMENT' (Server Status, Client Connections, Users and Privileges, Status and System Variables, Data Export, Data Import/Restore), 'INSTANCE' (Startup / Shutdown, Server Logs, Options File), and 'PERFORMANCE' (Dashboard, Administration, Schemas, Information). The main area is the 'Query Editor' showing a SQL query in 'Query 1' and 'SQL File 4*'. The query is a SELECT statement from a table named 'student_marks1'. Below the query editor is the 'Result Grid' showing a table with columns 'roll_no', 'name', 'subject', and 'marks'. The table contains 10 rows of data. At the bottom is the 'Output' pane showing 'Action Output' with a log of SQL actions and their results, including error messages for duplicate entries and table existence.
